Purpose
A structured, searchable source for a browser-only, no-LLM chatbot. Questions should match the most relevant FAQ or fact and receive a concise answer supported by this document.

Source and limits
This version combines the earlier public-website knowledge base with the additional property and operating details supplied in the conversation on 27 October 2026. Details that are explicitly variable, unspecified, or unclear in scope are marked accordingly. The chatbot must not treat a statement about one property as universal across every ReForbs property.

For the chatbot: answer from the text in this PDF. If a fact is missing or its property scope is unclear, explain the uncertainty and offer 7420040241. Never invent rent, vacancy, distance, capacity, or policies.

Location-response rule: For “Which PG is nearest to Pune Airport?”, the chatbot may state the supplied approximate 2.1 km / 11-minute drive for the Sanjay Park property. It must not claim that this proves it is the nearest among all ReForbs properties unless comparable verified locations for every property are available. Times are estimates, not guarantees.

Required chatbot behavior

- Classify the specific intent before selecting passages. A keyword such as “live” must not alone trigger availability intent.
- Prefer an exact FAQ and its answer over a generic paragraph. Preserve the difference between a single room, a floor, a wing, and an entire property.
- Return partial answers when supported, then clearly name what is not known. Never replace an answer with an irrelevant generic contact/location message.
- Use property-specific facts only for the property they describe. Do not automatically assign the Sanjay Park address to every named property.
- For nearby-destination comparisons, label distances/times as approximate and traffic-dependent; do not rank every ReForbs property unless comparable location data exists.
- Do not generate facts. Rent amounts, exact deposit terms, total capacity per building, couples policy, and live vacancies remain unknown unless updated with confirmed owner data.

10. Items still requiring owner confirmation

- Current property-wise monthly rent and current cheapest property.
- Exact deposit amount, refund timeline, and deductions.
- Live room availability and earliest move-in dates.
- Whether the Sanjay Park Lane 3 address is associated with one named property or serves as a central/representative location for multiple locations.
- Complete addresses and map links for Shubh Gateway, Reforbs Living Sakore Nagar, Moksha, Vipasana, and Shubh Nirvana individually.

- Total resident capacity per building and confirmation of the mentioned 7-room Moksha configuration.
- Explicit couples/unmarried-couple policy and overnight visitor rules.
- Exact inclusion of AC, parking, housekeeping, laundry, food options, and electricity in each package.
- Exact business hours, official WhatsApp number, support email, and per-property contact person.
- Current availability and applicability of CCTV/access controls at each property.

Version note: This document incorporates the additional information supplied in the conversation on 27 October 2026. Customer-facing facts should be updated only from confirmed management information. The earlier public-site claim that every room is single-occupancy is superseded here by the newer supplied detail that single- and double-occupancy room options may exist, depending on the property/room.
